

Revealed right below: The fastest and easiest way to learn Photoshop...

"Here's How You Can Learn... And Be Using Photoshop in One Hour and 57 Minutes or Less... Guaranteed"

"Could it really be *this* easy to master Photoshop? The Answer is "YES"... I was making graphics quickly and completely stress free... all in less than 2 hours. And I guarantee you can do the same... and I want to prove it to you.

Right below, you'll discover the same simple secrets I learned that took me from complete beginner... to Photoshop expert. Give me just 2 hours and you'll have the skills you need to start making pictures you're proud of... by tonight!

Dear Friend,

If you would like to learn how to use Photoshop in the fastest and easiest way possible...

So you're creating stunning graphics and quality pictures that you're proud of in a lot less time... then this will be the most important message you read.

Here's why:

My name is Mark Borg and I'm an Internet marketer and small business owner.

Since that's how I make my living, it's important that I know how to edit pictures, logos, images, and other graphics.

And Photoshop is the most popular image-editing program in the world. It's used by photographers, designers, artists, publishers, and people at home.

But the problem was... up until recently... I didn't know a single thing about using Photoshop.

I Was A Complete Beginner

I was always intimidated when trying to learn Photoshop myself. It seemed pretty confusing when I looked at the control panel.

So I'd send MY projects to other graphic designers, just to get them done.

It pretty humiliating and embarrassing to do that. I just knew I had to learn Photoshop... and fast!

So at the peak of my frustration, when I ran out of patience, I decided it was time to get smart. And it was then that I learned an important point that changed what I was doing...

If you keep doing the same things, you're going to get the same exact results. When you learn better, you can do better ... when you DO better, you GET better results.

What this means is, you can learn anything you need to learn to achieve anything you want to achieve.

Since I was tired of being clueless about Photoshop, I was determined to learn it myself. That way, I could do all of the things I wanted to do with graphics, pictures, and other images.

But There Was Only One Problem

I didn't know where to turn. I had no idea what the fastest and easiest way to learn Photoshop was.

So I started spending a ton of time sifting through *thousands* of junky, cluttered websites, looking for the good information.

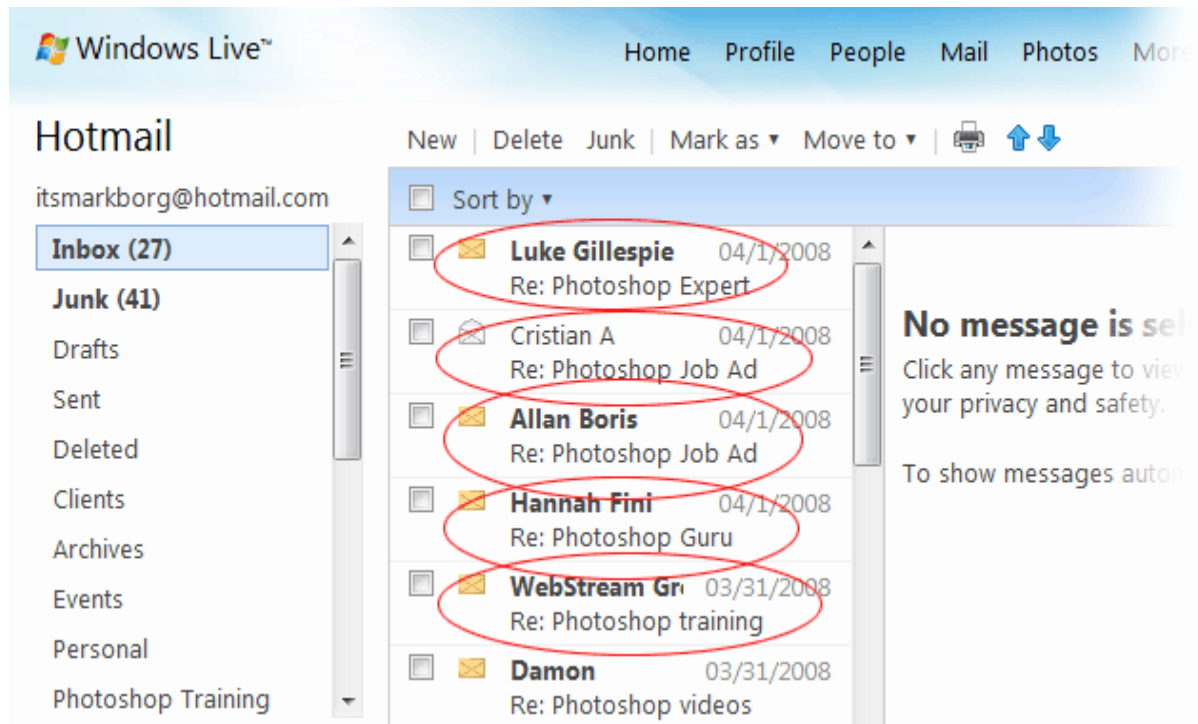

But with so many "thrown-together" websites that were full of nothing but ads and banners, I was *frustrated* going through all of them.

I just wanted an easy way to find the simple, clear instructions that would help me design pictures and retouch photos in the least amount of time.

I soon became completely fed up with trying to figure out Photoshop on my own.

I became determined to "crack the code" and learn this stuff the right way. So I spent a ton of time and money searching for the best Photoshop experts to train me.

In fact, here are some of the actual replies I got from my job posting...

I was looking for a **world-class team of experts** whose only goal was to cut out ALL of the confusion and teach me the secrets of Photoshop... so I could make better pictures and photos in the fastest time possible.

Soon, I had 5 of the best Photoshop experts that money could buy.

And believe me, I spent A LOT of money to get the best training possible.

These coaches had to take me, a complete beginner who didn't know anything about Photoshop...

And they had to make me an experienced expert...

In The Fastest and Easiest Way Possible

As we went along, my coaches recorded everything I needed to know in order to make incredible graphics and quality pictures. Every technique I learned, every principle I used.

These videos really explained the basics of Photoshop in a clear, easy-to-understand manner. (And you're going to see these exact same videos in just a minute).

I was amazed at how well these guys could explain even the most advanced Photoshop techniques so that a beginner could understand them.

Soon, I knew what worked and what didn't.

And in no time flat, these step-by-step instructions took me from confused beginner... to comfortable Photoshop expert.

Finally... A Clear, Practical Roadmap For Learning And Using Photoshop!

In less than a half a day, I knew all of Photoshop's tools, buttons and windows... and I was proud of the crisp, clean graphics I was able to create.

I was extremely happy because I was no longer confused doing the graphic design work I wanted to do. Better yet, the quality of my graphics was top-notch.

My confidence soared and I was able to design all sorts of stuff...

- **Business Logos**
- **Business Cards**
- **Posters**
- **Web Pages**
- **Greeting Cards**
- **Ebook Covers**
- **Product Boxes**
- **Magazine Covers**
- **Photo Albums**
- **Buttons and Badges**

I thought... how could something so simple be so powerful?

It seemed like magic.

But I wanted to make sure this wasn't just a "fluke".

I needed to test these strategies with others to make sure they'd work for them as well. I wanted "real-world proof that anyone could easily copy my step-by-step method for learning Photoshop in under 2 hours.

So it was time for...

The Mom Test

That's my mom in the picture above - Jill Borg. She's been a nurse for 24 years and barely knows how to check her email on the computer.

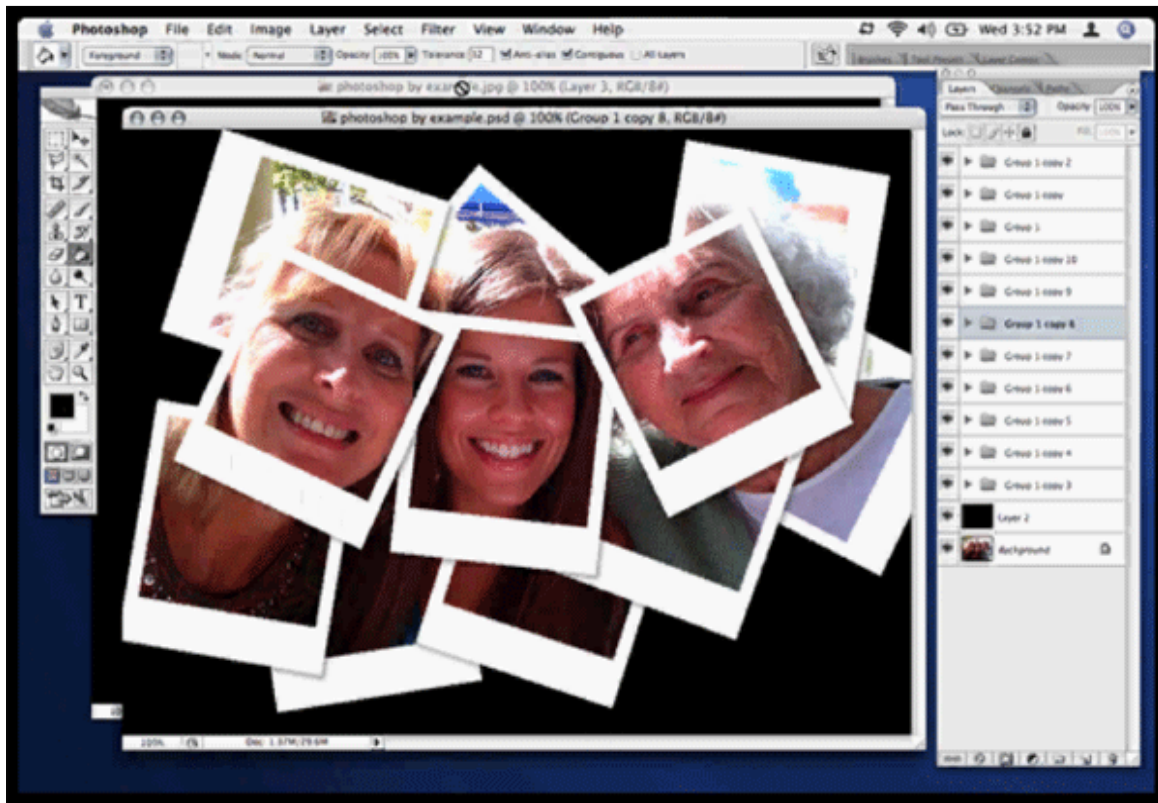

I knew if my mom could watch these videos and start creating stuff in Photoshop... then ANYONE could.

It was a Thursday at about 2:20 p.m. when I arrived at my mom's house. I told her I had spent the last few hours learning Photoshop. I showed her some of the new graphic design work I'd been doing for my clients.

I asked her if she'd be willing to watch a few videos that would teach her about it.

After she said yes, I loaded up Photoshop, plugged in her headset, and had her watch the same videos my coaches created for me.

After just a few short hours... I took a screenshot of what she'd done:

I Was Blown Away!

She created this photo collage of her, my younger sister Aubrey, and my grandma.

Needless to say, I was amazed that my mom... who had never touched ANY graphic-editing software before in her life... was able to create stuff in Photoshop after watching these videos!

After seeing how well my mom did, I spent a few days trying them out with other members of my family.

- my older brother (an accountant),
- my aunt (retired) and
- my cousin Sophie (13 years old)

And they were able to get amazing results in a very short time as well!

Now I knew that ANYONE, even people afraid of computers, could quickly and easily learn and use Photoshop.

I had "cracked the code" on Photoshop.

And I just knew I had to share these simple and easy-to-understand videos with others.

So I put up this website to help you cut out the confusion and learn Photoshop in the quickest and easiest way possible.

And now, since I've been offering these same powerful training videos online, well over **5,773 people** have used them with absolutely astonishing results! So these videos have been **proven** to work, time and time again.

**But Please Don't Take My Word For It.
Here's What Some Of Them Are Saying...**

"Thanks for your fantastic website and videos. It was the best investment I've ever made and has taken my Photoshop experience to the next level."

Dave Hallows

"I just wanted to thank you for the excellent Photoshop videos you provide. They have allowed me to learn photoshop over the course of a few nights and I have already started using some of the techniques to improve my digital scrapbooks that I create with photos of my family."

Sally Kerns

"I've watched all 43 of the videos and I must say that I'm totally blown away. The level of detail is just fantastic and the videos are so easy to follow along with. It feels like I have my very own Photoshop trainer and I'm looking over his shoulder."

Jack Gesinger

"I'm 68 years old and although I normally am a slow learner with technology, I followed your videos just fine! I wanted to create a logo for my company and your videos showed me

exactly what I needed to know, and they were easy to watch."

Frank Spence

"I had just downloaded photo shop before I found this web site. After 4 hours of watching the videos I'm very excited that I can now create banner adverts for the company I work at. I have already told 4 others guys at work about your web site and they are going to buy your fantastic videos as well."

Tim Giudice

"I saw the promotion for PhotoshopByExample.com in the Better Photoshop magazine and decided to check it out. After I watched some of the free videos I ordered and havent looked back since. Great videos with real world practical applications of techniques which I have been using to compliment my freelance web design services for clients."

Steven Fenessy

"I purchased Friday and it is now Sunday night. I've watched 25 videos so far and I'm really confident in my Photoshop abilities. Kudos for this fantastic web site!"

Paula Dean

But here's what's important: If regular people like my Mom and I can achieve amazing results like these ...

There's No Reason You Can't As Well

I want you thinking "Yeah, I can do this too!"

And the truth is, *you can!* I'm going to take you by the hand and show you, step-by-step, exactly how I did it and why I think you can too.

But first, do me a favor.

Take a few minutes and picture this...

It's just 2 hours from now and you have the skills you need to design websites,

album covers, T-shirts, download buttons, banners, flyers, and ecovers.

You're now an expert in Photoshop... showing off your talent to friends and family by creating digital masterpieces!

You're now able to use all the coolest features in the fastest and easiest way... getting images into Photoshop and turning them into dazzling works of art.

Imagine The Thrill Of Creating High-Quality Graphics For Yourself!

And what if, in under 2 hours, you could effortlessly convert your graphics into gorgeous designs?

What if you could turn your photos into the ultimate digital works of art!

You're having fun making T-shirt designs, using brushes, creating effects and backgrounds. Taking old pictures from your family photo album... and making them like NEW again!

Is all of this impossible? Is it a gimmick or some miracle?

Of course not.

It's From Watching These Simple Videos!

Clearly, the fastest way to learn anything is to copy a method that's *already* been proven to work.

You need a guide you can use, over and over, to shorten your learning curve and speed up results. **That way, there's no guess-work at all.**

And right now, you can get **ALL** of these powerful videos... for a tiny *fraction* of the price I had to pay.

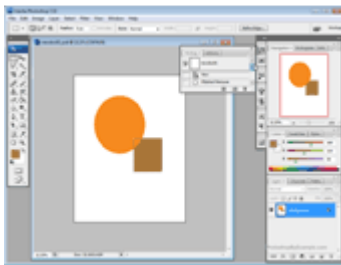

I've taken all the "little-known" secrets I used to become an expert with Photoshop in under 2 hours... and made them available in these videos that you can start watching right now.

It's *literally* a simple, **step-by-step** system you can use as a shortcut to success.

- **Learn how to work with images** Getting images into and out of Photoshop, downloading from your digital camera, and scanning prints.
- **How to fix and touch-up family pictures** - Crop and export photos, fix photo quality and touch up pictures easily, change color balance and mix brightness together for perfect output. Master skin, hair, and beauty retouching
- **Whether you're 15 years old or 50... new user or expert** - you'll learn the simple tricks to using Photoshop for changing backgrounds, changing faces, creating hair or skin texture, editing old photos, and more.
- **Start a new business and make money** - You can take your techniques and become a professional designer that works on advertising for high-paying agencies. Set up your own business to become a graphic designer that works on pictures and graphics for others.
- **Have fun at home** - Maybe you want to learn something new and exciting. Photoshop will give you something fun and rewarding to do in your free time. Leisure photography, working with family, holiday, and travel photos for albums or websites, the sky's the limit.
- **Update your photo albums** Convert black and white photos into color. Learn to creatively color photos, highlight certain parts of photos and

make them look professional.

Believe me, that's just a small sample of what you can do!

You can use these videos in all areas of your professional and home life. They'll teach you everything you need to know in order to make the best pictures possible.

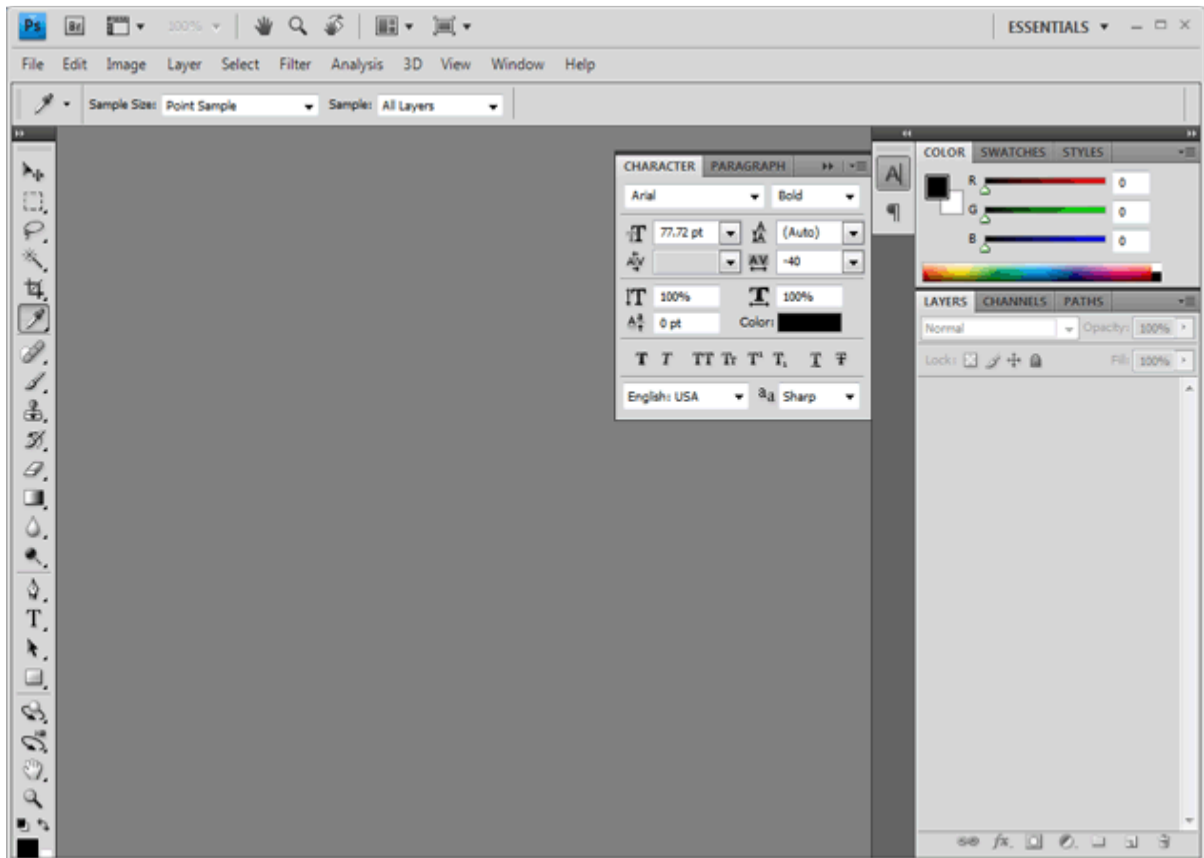

Who Needs These Videos?

Well, if you're already a photoshop expert and can do things with photoshop that most people can only imagine, then you probably don't need these videos.

If you're an expert that could probably teach a university computer science class how to use photoshop, you probably don't need these videos.

But if you're anything like me, someone that really wanted to know the ins and outs of photoshop in the fastest and easiest way possible, then this was made for you.

In fact, if this screenshot of Photoshop confuses you...

Then these videos will help you learn, understand, and use Photoshop in less than 2 hours.

That way, you can stop wasting time sifting through cluttered website after cluttered website, trying to sort out the good Photoshop information from the junk.

In fact, my Photoshop coaches were given detailed instructions on how I wanted these videos to be made.

I made sure that ANYONE who watched these videos...

- Didn't have more than a basic knowledge of computers
- Didn't want to read 500+ page manuals or boring books
- Didn't have much time and wanted to "cut through the confusion"
- Preferred seeing how things are done by watching, instead of reading

- was able to start using Photoshop at an expert level by tonight

If you're frustrated with spinning your wheels when using Photoshop, not satisfied with the graphics you're currently making, these videos will eliminate that frustration.

They truly are the simplest, most effective way of learning the true capabilities of Photoshop.

Imagine How Envious Your Friends and Family Will Be!

These easy to follow photoshop video tutorials are full of practical tips guaranteed to save you time and make you more productive.

What's more...

- **These videos assume you've never used Photoshop.** Every button, toolbar, menu, dialog box and setting is explained in clear, easy-to-understand detail so you'll never be left scratching your head.
- **The video training is interactive.** You can follow along with every video and copy the steps to replicate exactly what you see. You can pause, rewind, fast forward and more - just like YouTube.
- **The training is fun!** The Photoshop experts who recorded the videos are upbeat and really make learning exciting. I asked them to throw in real world examples of how and why they use certain techniques over others, etc.
- **The videos work on both Mac and PC,** as do the techniques. For example, when describing a hotkey you'll hear "To save press ctrl+s on a PC or option+s on a Mac".

And not only am I confident these videos give you all the "insider secrets" needed to master photoshop in less than 2 hours time...

I Guarantee It And Have The Results To Prove It!

(More about my guarantee to you in a moment.)

That's because these videos **work**.

I've tested and proven it by my own trial and error. Not only that, I've shown them to thousands of regular people. And they've worked for each and every one who has *seriously* applied what they watched.

Below are a few more of the **hundreds of testimonials** I've received from people having incredible success from following them.

"THE BEST PHOTOSHOP TUTORIALS ON THE WEB
HANDS DOWN - YOUR WEBSITE BLOWS MY MIND!"

CJ Corpin

"As soon as i saw the free videos i had to sign up. The techniques used in those videos really impressed me and i was eager to learn more of the beginner methods. Needless to say i've watched another 10 or so videos since i purchased and i really do feel confident using Photoshop to create graphics."

B. M. Cuthbertson

"I was given a copy of Photoshop CS4 and had never used it before. After a quick search on Google I found your website and watched the free videos. I got your tutorials and have really learnt alot about Photoshop in a few short weeks. Congratulations for living up to your promise that anyone can learn to become a Photoshop expert - I am living proof of that :)"

Ali Merhi

"Now that I consider myself a Photoshop expert I am confident I can leave my job and start a freelancing carrer!!! Thank you VERY much for your videos. You have a customer for life and I am grateful that you have helped enhance my skills - especially in this tough economy. I can now freelance and am getting at least 3 new clients a week!!!"

Damil Maningas

"Great videos that are easy to follow along with - even for me!!!"

Dan A. McAlpine

"It is amazing how much quicker you can learn by watching some one else. The quality of the videos and the clear explanations on even the complex subjects is why i love PSBE."

M Ling

"I have yet to find a more practical and easy to follow resource for learning photosho than PSBE. Each video is fun to watch and very informative. Your videos are easier to follow then normal "article" based tutorials and I appreciate that your tutorials work on both MAC and PC because I have a MAC at home and 2 PCs at work."

Jesper Idon

"I do not normally send testimonials to any websites - and I use a lot. I am a graphic designer by trade but would only consider myself an intermediate Photoshop user. That was until 3 weeks ago when I found this site. I have watched every video - even the beginner ones - and would now classify myself as a Photoshop guru. The video tutorials are really invaluable and I cannot recommend them highly enough!!"

Tina Lebrasky

"PSBE is great. I used it to learn Photoshop in just a weekend!"

Hanna Buckland

"I tried to learn Photoshop by watching videos on YouTube but the people who posted the videos obviously did not know how to teach. I saw your ad for PSBE on YouTube and clicked over and was blown away with the video topics and helpful advice from your Photoshop experts. They know how to teach and I like how they mix in their personal experiences with the videos."

Victor Kapimilous

"I am a graphic designer for the multimedia studies program in

San Francisco and I have been using your videos to teach students the intimate details of Photoshop. Your videos in combination with online coursework and assignments comprise the majority of our studies program and I am thrilled to be associated with Photoshop By Example."

Stacy Vasilev

"I vote Photoshopbyexample.com as the best graphic design and photoshop website on the net!!! I have searched high and low and do not know of any other site which has as many comprehensive videos as yours. I just wanted to let you know that."

Drak Zorbas

"I used what I learned from your web 2.0 logo videos to create a new logo for my company. If that's not a hands-on use of the knowledge you share on this website then I don't know what is :)"

Jen Posner

"I love PhotoshopByExample. It is a one stop shop for everything Photoshop. The range of videos covers everything from beginner to intermediate to advanced, and if I can learn Photoshop (a complete newbie to computers!!!) then anyone can!!"

Isac Leghorne

So What's The Bottom Line? How Much Do These Videos Cost?

Well, let me ask: What price can you put on cutting out **hours** of needless surfing through junk websites and hard-to-understand books. **What is your time worth?**

Because I can offer you my step-by-step system on video, I don't have to be there in person.

And you don't have to spend \$5160 to hire your own coaches, like I did.

This means you can get the very same Photoshop coaching system for even less - AND you can get started IMMEDIATELY!

So I'm not going to charge you the \$5160 these videos cost me. And I'm not going to charge you \$2500... or \$599... or even the original \$149 price I intended.

For a short time only, I'm offering a very limited HALF-PRICE DISCOUNT. If you order today, your investment in these videos is now only ~~\$149.00~~ \$79.00

**For Less Than The Cost Of One Starbucks Coffee
A Day, You Can Have Me As Your Personal Coach!**

And unlike coffee, the information on these videos will stay with you a lifetime.

If you've ever looked over the shoulder of someone who really knew their stuff, you know that this is the fastest way to learn.

These videos are just like looking over my shoulder! They'll walk you through everything you need to know in a fraction of the time it would take to train yourself through a book.

You can use these new skills to create eye-catching graphics that will blow away friends and family... and impress professional graphic designers.

Look, if you learn this same stuff at a private college, you'd spend 6 months and \$3,000.

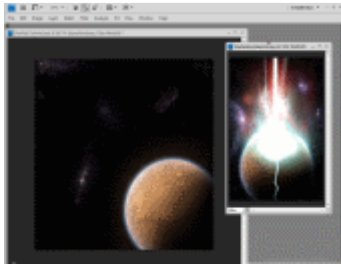

Even if you hired a few Photoshop experts to train you like I did, it would cost you \$5,160

But here's the best part: You don't have to spend the \$5000 dollars figuring this stuff out like I did.
